Portfolio: profileme-seven.vercel.app

PROFESSIONAL SUMMARY

AI/ML Engineer skilled in building machine learning, deep learning, and full■stack applications. Experienced with Python, TensorFlow, PyTorch, NLP models, Flask, FastAPI, and React. Strong expertise in deploying ML models, chatbot development, image processing, and end■to■end AI solutions.

TECHNICAL SKILLS

Programming

Python (NumPy, Pandas, Scikit■learn, TensorFlow, PyTorch, YOLO), C, C++, Java

Machine Learning & Deep Learning

CNN, RNN, LSTM, GANs, NLP (SpaCy, Transformers), Regression, Classification, Clustering

Web Development

HTML, CSS, JavaScript, React.js, Flask, FastAPI, PHP

Tools & Platforms

Jupyter, VS Code, Google Colab, Git, GitHub, PostgreSQL, MySQL, LangChain, Ollama, Gemma

Cloud & APIs

Google Cloud, REST APIs, OpenCV, PyPDF2, YouTube API

PROJECTS

InstaScan – Real vs Fake Instagram Profile Analyzer

- Built an ML model using RandomForest to classify real vs fake Instagram profiles.
- Automated feature extraction using Instaloader for real■time predictions.
- Developed a React frontend integrated with Flask backend.

Ahana Chatbot (Internship Project)

- Built chatbot with Gemini API integration, file upload, web scraping & predefined responses.
- Implemented chat logging to Excel and added document/question answering features.

Career & Learning Recommendation System – TechCareerHub

- Developed ML■based recommendation engine with NLP, search algorithms & YouTube scraping.
- Built full■stack app using Python, PostgreSQL, and React.js.

Wild Animal Intrusion Detection (CNN)

- Implemented CNN■based model using PyTorch & OpenCV for real■time intrusion detection.
- Achieved high accuracy and deployed a web monitoring interface.

Number Recognition (CNN)

- Developed CNN model for digit recognition on custom dataset using TensorFlow/PyTorch.

INTERNSHIP EXPERIENCE

AI/ML Intern – Ahana Systems & Solutions Pvt. Ltd. (4 Months)

- Worked on ML automation, chatbot development, and Flask backend pipelines.
- Implemented number plate recognition using OpenCV & deep learning.
- Developed production-ready APIs and contributed to internal AI tools.

EDUCATION

B.E – Artificial Intelligence & Machine Learning (2021–2025) — CGPA: 8.75
Adichunchanagiri Institute of Technology, Chikkamagaluru

PUC – PCMB — 88.64%

Govt PU College, Chikkamagaluru

SSLC — 83.66%

S.V.S.H High School

CERTIFICATIONS

- Python for Data Science (NPTEL)
- Machine Learning & Deep Learning Projects (Udemy)
- Cloud Computing (NPTEL)
- Machine Learning with Python (FreeCodeCamp)
- Generative AI – AWS
- Web Development Bootcamp (Udemy)

ACHIEVEMENTS

- RBI Nationwide Quiz 2024
- ISRO Chandrayaan-3 MahaQuiz
- Workshops: AI, Cybersecurity, Deep Learning
